MEAE

Goal

The MEAE 2018 will be an internationally renowned forum for researchers, practitioners, and educators to present and discuss the most recent innovations, trends, experiences, and challenges in the field of Mechanical Engineering and Aerospace Engineering. It will bring together experts from academia and industry to exchange the latest research results and trends, and their practical applications in the aforementioned areas of Mechanical Engineering and Aerospace Engineering. This will be accomplished through the following three modes of communication: keynote presentations, parallel sessions, and poster sessions.

MEAE 2018 will provide an international exchange platform, gathering self-learning and industry experts and researchers, exchanging mechanical engineering and aerospace engineering research results and future development trends.
